

Project Profile

Client: QGC Brownfields Group

Scope: Low Point Drain Modifications

Scope includes:

- Remove internals from LPD
- Perform level control checks and calibration
- Clean swarf from LPD, flush LPD, surface pipe and facilities
- Install extension components as required and install valve cage/strainer to protect float valve from getting blocked with solids/swarf
- Reinstatement and flange management
- Complete As-Constructed and Closeout Documentation
- Modifications completed for approximately 230 LPD's
