

MEDIA RELEASE

iPipe Services committed to trading under Voluntary Administration

12 April 2019

Following recent media coverage of iPipe, it's important that I update you on the business and our commitment to trading under a Voluntary Administration while we undertake a business sale process. iPipe has not been immune to the pressures of accelerated business growth and we trade on, in the best interest of our people, clients and suppliers that have supported iPipe since it's early beginnings.

iPipe was established in 2013, with the vision of being an independent service provider to the oil and gas industry. iPipe has led the way in Coal Seam Gas industry standards development, upholding a reputation for innovation through it's industry partnerships. iPipe has fulfilled a gap in the market, developing technologies, tools and methods which optimise gas production & pipeline construction.

Throughout the sale process we are committed to our people our creditors and our loyal CSG industry clients as we continue to deliver the same high quality, specialist work in a safe manner.

Thank you to all who have shown their loyal support.

Jamie Gabb

Chief Executive Officer – iPipe Services Pty Ltd
